

# Another award: TOP innovators from Kirchheim

Schneider Kunststofftechnik again in the TOP 100

It's a great start to the summer for Kirchheim-based Schneider Kunststofftechnik GmbH: the company, led by MD Drita Schneider, has once again been recognised as one of the TOP innovators amongst German SMEs. The award, presented annually to the best SMEs by the well-known TV journalist Ranga Yogeshwar, was given to Schneider Kunststofftechnik for the second time in a row this year. It completes a wonderful treble – the company won an award as "TOP Employer" in February 2017.

"We have plenty of things planned, and these awards are a great help in demonstrating that we are

Yogeshwar.*

seen as an innovative service provider, and also a great employer," says Schneider, who is also pressing ahead with a project that is close to her heart: in the UJETA water filter, Schneider Kunststofftechnik has developed a patented water filter that reduces all germs, bacteria and any other contaminants by 99.9995 per cent. Through the charitable organisation Kindernothilfe Österreich, the UJETA filter has been in use in the disaster area in Haiti for six months, supplying over 300 children and young adults with fresh water of spring-water quality daily since the hurricane disaster of October 2016. The commitment demonstrated by the Kirchheim-based family-run

company is commendable. The innovative ideas from the Unterallgäu region are attracting more and more media attention, and recently several TV crews were filming in Kirchheim.

At present, Drita Schneider is investing intensively in manufacturing. It is planned to install three new injection-moulding machines and automated lines by the autumn, because for all its love of water Schneider Kunststofftechnik GmbH is one thing above all else: an innovative and highly flexible company for production of injection-moulded parts that are used in their millions in the automotive supplier industry, in mechanical engineering and in packaging and sensor technology.
